

The Butterfly Effect - Ian Luther

A butterfly flaps its wings in China  
Then did you know a storm could blow on America  
And if you throw a stone into the sea they say  
The ripple could become a wave one day  
And when will we will learn it's the smallest things  
That change the world tomorrow

So when tomorrow comes  
I'm gonna make some waves  
With the biggest stone that I can find  
Cos I can change this world  
And do anything  
All I gotta do is flap my wings

A butterfly flaps its wings in China  
Then did you know a storm could blow on America  
And if you throw a stone into the sea they say  
The ripple could become a wave one day  
But when will we will learn it's the smallest things  
That change the world tomorrow
